Erratum

In the December 2004 (Volume 9, Number 8) article by Prabha S. Karnachi and Frank K. Brown, “Practical Approaches to Efficient Screening: Information-Rich Screening Protocol,” the legend for Figure 4 was printed incorrectly on page 684. The correct legend appears with the figure below.

FIG. 4. Cluster representation of the structural classes of the actives. [ ] = cluster with at least 1 active member; [ ] = cluster with no active member; [ ] = cluster with no active member from sequential screening and binary QSAR model; [ ] = new cluster with at least 1 active member as identified by binary QSAR model.
